Vol. VIII, No. 10

October 1964

SEPTEMBER UNIFORM PRICE \$4.15

Dairy farmers will receive a uniform price of \$4.15 for September 1964 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7.4 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. The minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge. This price is 14 cents higher than the August 1964 price and is 12 cents higher than the uniform price of a year ago.

PRODUCER RECEIPTS

Daily producer deliveries decreased slightly from August 1964 and are over 2 percent less than a year ago. The drought conditions occurring in late August and September have evidently had an effect on the milk supply, as producer receipts always started to increase in September for the past few years. Recent reports, however, indicate that producer receipts are on the increase again in October.

CLASS I SALES

September is usually a good month for Class I sales, but this month they exceed the August 1964 sales by 10 percent, and are 3 percent higher than September of 1963. This increase in sales accounts for the higher uniform price, along with the slight decrease in producer receipts over the September 1963 uniform price. A year ago the Class I price was seven cents less than this September, and the uniform price was 12 cents less, which means that five cents of the increase was the direct result of increased Class I sales, which make higher utilization.

CLASS I PRICE

The Class I price for the October 1964 delivery period will be \$4.48 per hundredweight for 3.5 percent milk. The price was computed by adding \$1.30 per hundredweight to the basic formula price (\$3.24), minus the 6 cent supply-demand adjustment. The supply-demand adjustment for the November 1964 delivery period will be a plus 2 cents.
